

November 12, 2021

At the end of this school year, the district will begin HVAC renovation projects at Governor Wolf, Freemansburg and Calypso Elementary Schools. The projects at each school include removing the existing heating and air conditioning systems and providing new heating and air conditioning systems which will improve air quality; ventilation; temperature and humidity control; and classroom acoustics for all students and staff.

In order to complete the renovations prior to the beginning of the new school year in August 2022, the end of the current school year calendar must be modified. The last day for in-person instruction will be moved from Wednesday, June 8, 2022 to Wednesday, May 25, 2022. On May 26, 2022 students will transition to remote learning for the remainder of the current school year.

Additionally, beginning May 16, 2022, the cafeterias and kitchens at each school will be closed. From May 16 through May 25, 2022, bagged lunches will be provided at each school. During remote learning, meals will be offered for pick-up at a still to be determined time and place.

These proactive end-of-year schedule changes at these three schools will ensure that the district meets the state-mandated number of days and hours of instruction, while also providing critical, additional time for construction. The additional construction time at the end of this current year will increase the probability that each building is ready to open for the first day of the new school year in August.

Thank you for your understanding.

Sincerely,

Kathleen Bast
